

# 5 STEP DISASTER RECOVERY PLAN

1

## **Identify critical operations**

First, you identify what operations are critical to your business and how the interruption would impact your company's ability to operate.

2

## **Evaluate any of your disaster scenarios**

First, identify what operations are critical to your business and what interruptions would impact your company's ability to operate.

3

## **We will create a communication plan for you**

Develop a plan of action for your business that assigns specific roles to selected people and departments across your company.

4

## **Create a personalised data backup and recovery plan**

Creating a strong personalised plan will include solutions into fixing any problems that may occur as well as including instructions on how to contain the existing disaster and monitor for future intrusion.

5

## **Test your plan**

Make sure there are no gaps in your personalised recovery plan and strengthen any additional steps to increase efficiency.
